

LEARNING TIMES TABLES WITH RESIST PAINTING

HOW TO USE THESE PRINTABLES

Gather the following materials:

 Printer Paper

 White Crayon

 Watered Down Paint (or water colors)

 Paint Brush

OR

 Small Pompom Pinched with Clothespin

Instructions:

Print the worksheets of each times table you want your child to practice. Then, use the white crayon to write the answers. They should be “invisible”. If they are not, you will cover the answers as your child works through the problems and only reveal them when it is time to check the work. Have your kiddo say the answer to the math problem and check their answer by painting over the invisible answer. The number you have drawn in white crayon will then show up like magic.
